The Cigar Room

A gentleman's club-inspired room includes contemporary and traditional elements that are seamlessly married in an eclectic blend of furniture, art, and accessories. Tweed fabric upholstered walls and nail head trim set a masculine tone for the room, creating a club-like atmosphere enhanced by wall-mounted antlers. An operating humidor cabinet anchors the space, providing the perfect place for displaying a valued collection of cigars and cigar boxes. Lounge chairs placed in a diagonal orientation add interest, while an oversized area rug ties the seating circle together. Blue fabrics lighten the area, which maintains a club environment with the use of paisley slipcovers. Blue was also repeated in the ceiling, offering a sense of serenity. The Cigar Room is a calming refuge that refreshes and prepares one for enjoying and contemplating the many adventures life has to offer.
